

User Guide for Employee Profile

Employee Perspective:

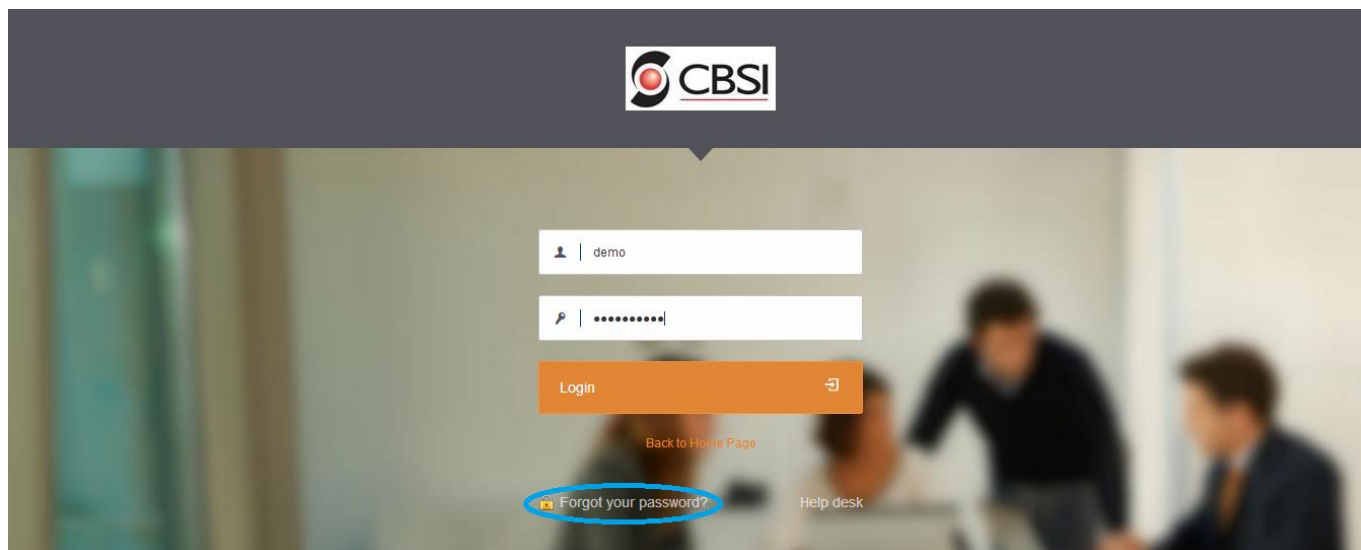

Once employee access the URL provided in the welcome mail with login credentials for accessing the portal, below show screen appears, where employee needs to update their User Id (by default their employee code) and the password shared in welcome mail.

Once employee clicks on Login button for the first time, after inserting login credentials, system takes them to the registration page, where employee needs to register themselves by updating below mentioned details:

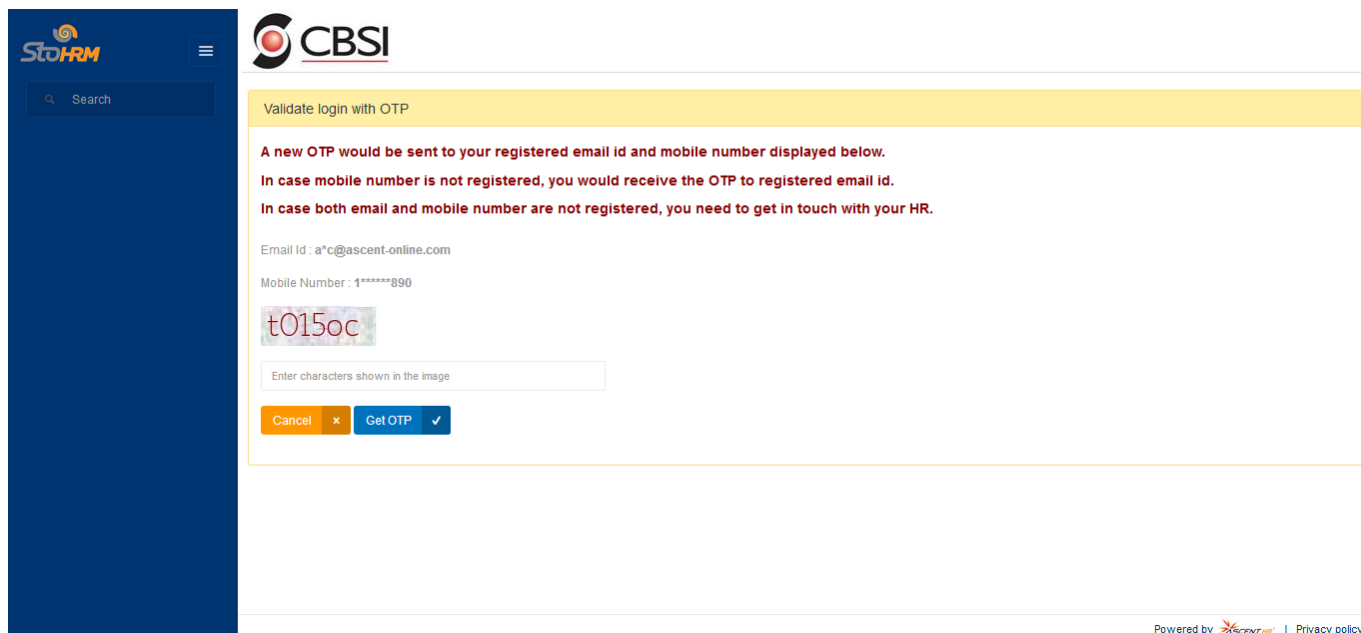

- Date of Birth
- Setting of Security Question & Password
- Setting password of their own choice.

The security details set on this page helps employee in the scenario of forgetting password. In case employee forget the password set while registration, employee need to click on below provided option of Forgot your password.

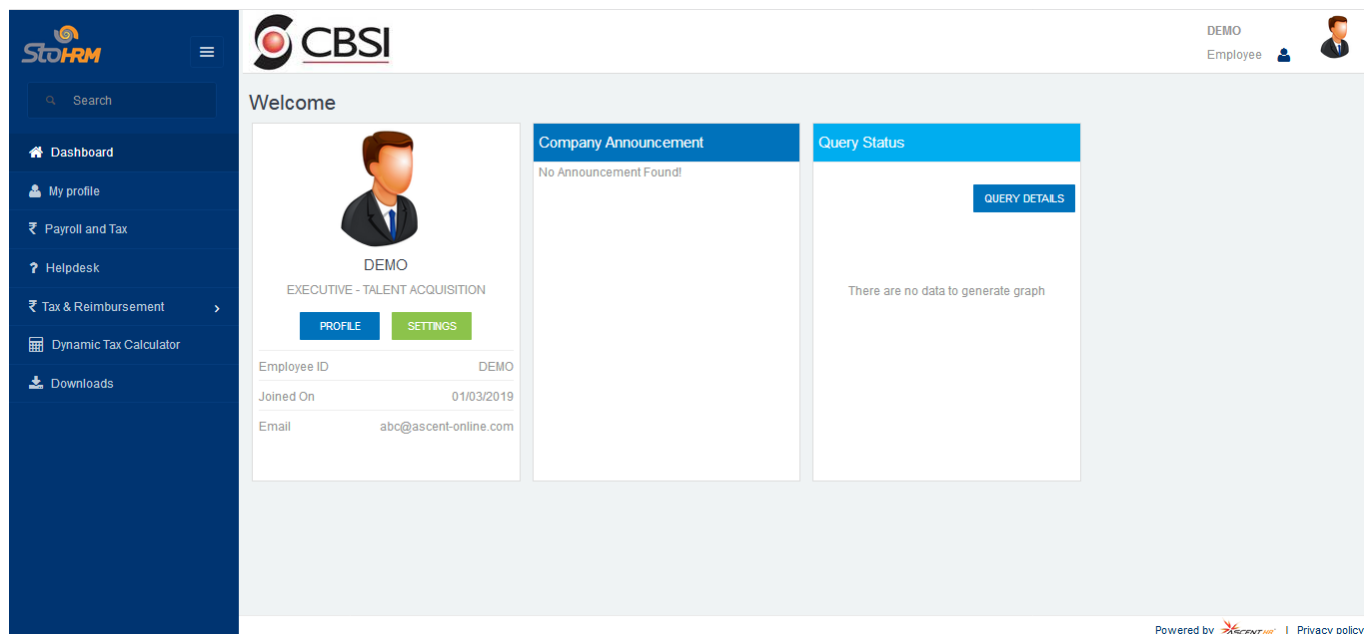

After clicking on Forgot your Password link, system will get ready to send an OTP to employee's official emailed/registered mobile number, which further help them with login.

Process of registering mobile number is explained later.

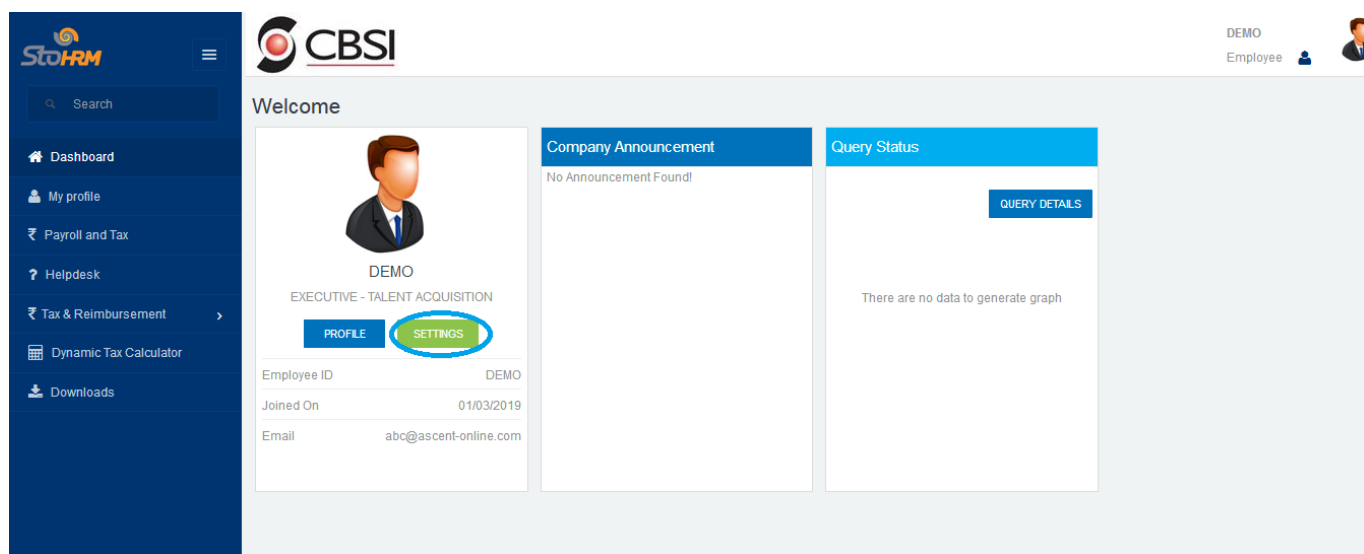

When employee logs in to the application, below is the screen that gets displayed. This page is called as Dashboard where employee will be able to view their basic profile details and Query status as shown below.

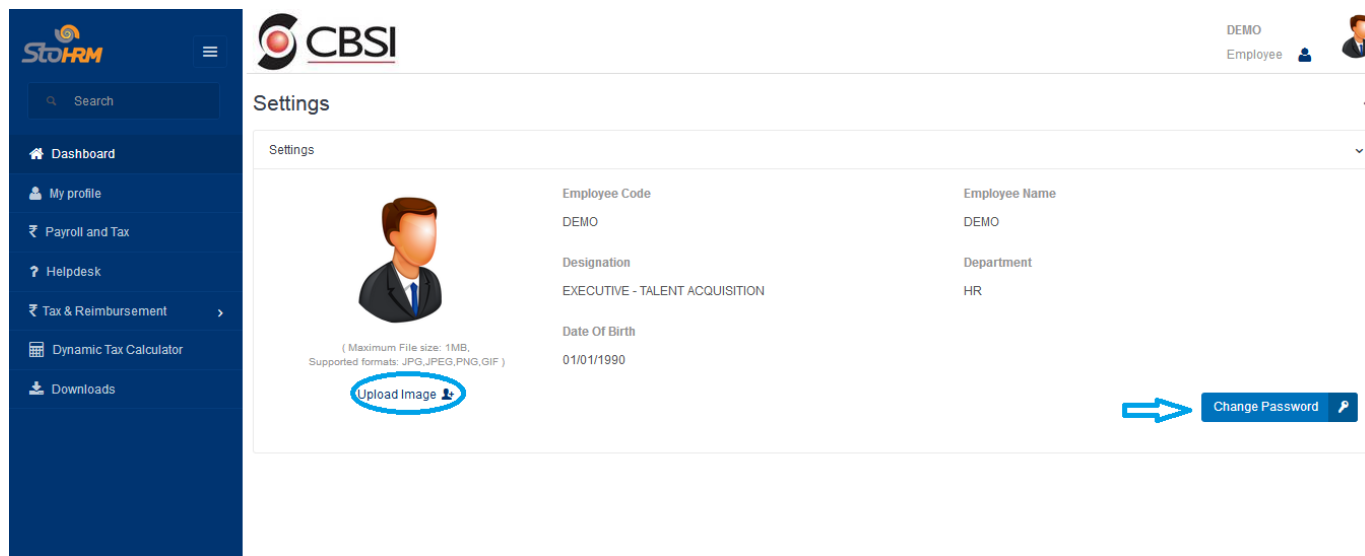

Registering Mobile Number for OTP generation

Employee should click on Settings option as highlighted below.

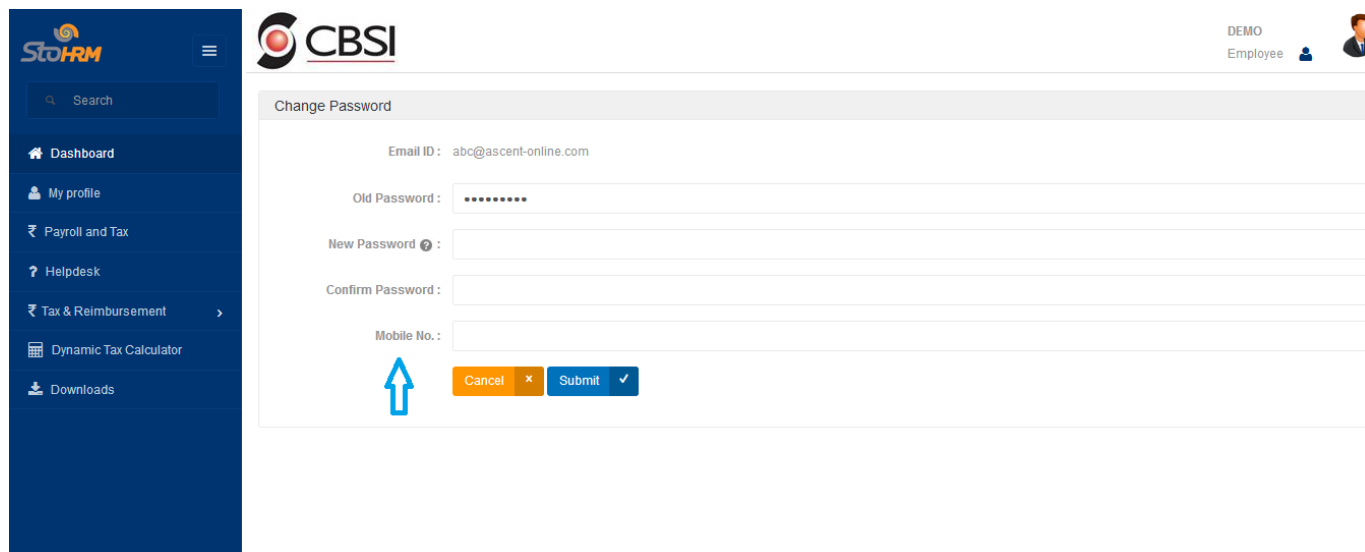

Once Settings is clicked upon, below shown screen will appear which provides option to employee for uploading image for profile (if required) and to Change Password.

Employee should click on Change Password link:

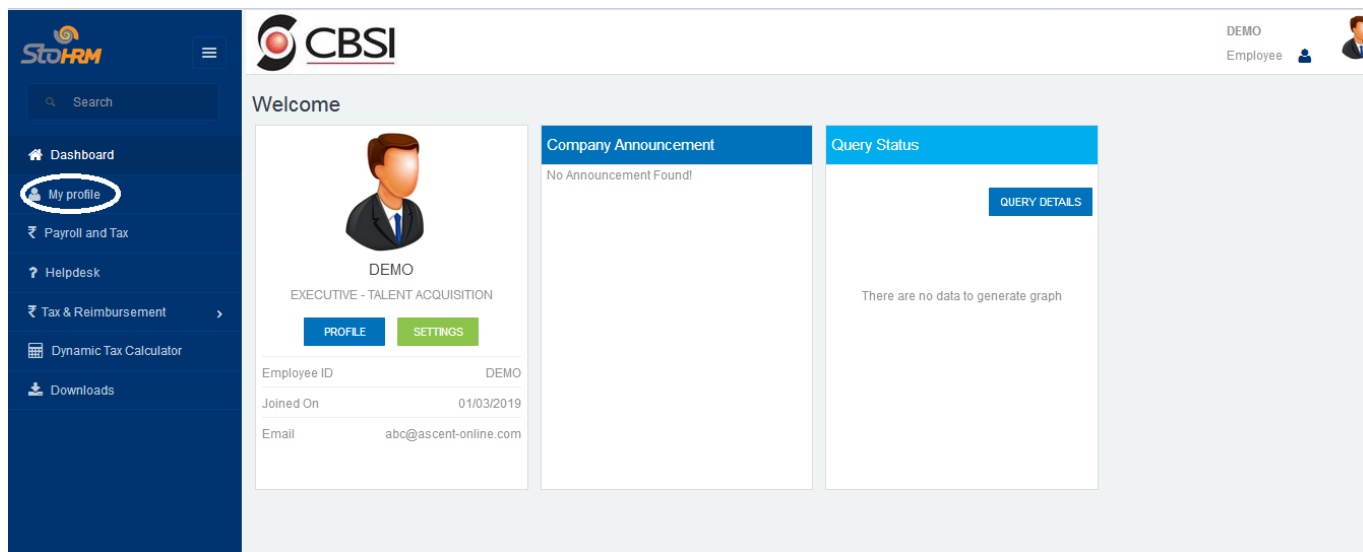

Once employee clicks on Change password, below shown screen will appear which provides fields to employee for changing password and here only employee can update Mobile number.

*****Once employee updates mobile number here, in future if he/she forgets password and try resetting password via “forgot your password?” link available on Login page, system will automatically send OTP to employee’s registered mobile number, with which employee can login to portal again.**
